

FOR IMMEDIATE RELEASE

### ***Trimco Hardware Launches New Wrap Plates***

*Los Angeles, CA – January 5, 2015 – Trimco Hardware, an industry leader in high-performing security and protection hardware for government, commercial and institutional buildings, today announced the launch of the 5200 Series Wrap Plates and Filler Plates. The 5200 Series Wrap Plates are used to reinforce doors around the lock and latch, reducing the need to replace the door. With a wide range of standard sizes, backsets, door widths and bores, as well custom options, the new product portfolio has a solution for most applications.*

*Jason Bennett, Trimco President and Chief Executive Officer commented, “The addition of the 5200 Series Wrap Plates to our already robust product offering supports our focus on solutions-oriented product development and the modernization of Trimco.”*
